

PRESS RELEASE

Ship design on the next level: better performance by using bare-metal cloud solutions

CPU 24/7 announces Live Webinar

Potsdam, 18.10.2016

On 26th October 2016, CPU 24/7 will host a webinar *Improving Ship Design with FINE™/Marine On Cloud* in cooperation with NUMECA, SimFWD and UberCloud. By simulating a Ropax bare-hull-form resistance, speakers and participants will assess the resistance reduction in the most efficient and reliable engineering CFD workflow.

CPU 24/7 and partners show how development time and cost can be reduced by running NUMECA FINE™/Marine on cloud, offered by the German cloud service provider CPU 24/7 itself.

Interested parties can register here (at least 24 hours in advance):

Session 1: October 26th 2016 - European and Asian business hours: 10:00AM (Brussels), 4:00PM (Beijing), 5:00PM (Tokyo)

About CPU 24/7 GmbH

CPU 24/7 GmbH is a leading provider of CAE as a Service (CAEaaS) solutions. Headquartered in Potsdam / Germany, CPU 24/7 develops and operates unique on demand services for High Performance Computing (HPC) that are based on the latest globally accepted industry standards for hardware, software, and applications. Since 2006 CPU 24/7 has served in particular the high end CAE markets in e.g. automotive, marine & offshore, transportation, oil & gas, as well as aerospace, where these services are designed to fulfill all requirements of even the most demanding jobs. CPU 24/7 provides its customers flexible, pre-configured and "ready-to-use" CAEaaS infrastructures hosted in the CPU 24/7 Cloud. Services are provisioned 'on-demand' and remotely, eliminate expensive upfront investments and are immediately available.
